

YOHANNES NIGUSSE

425-780-7415 | yohanigusse@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

St. Cloud State University

St. Cloud, MN | Aug 2024 – Dec 2026

B.S. Computer Science (AI/ML Track) & B.A. Economics · GPA: 3.75

Coursework: AI & Neural Networks · Distributed Systems · OS · Database Theory · Computer Architecture | AI4ALL · CodePath AI 110 · TIP 102 | NSBE · Cloud Computing Club

University of Maryland, Baltimore County

Baltimore, MD | Jan 2023 – May 2024

Computer Science Transfer Student — Dean's List Spring 2024

EXPERIENCE

Accenture

Seattle, WA | May 2026 – Present

Technology Analyst — AI & Cloud Practice

- Incoming analyst on the AI & Cloud practice; selected through NSBE 2026 career fair pipeline (Baltimore, Mar 2026); role focuses on enterprise AI solution delivery and cloud modernization.

Kibur College — AI Admissions Assistant (CO-OP)

Remote | Jan 2026 – May 2026

AI / Full-Stack Engineer

- Built a multi-channel RAG-based admissions chatbot (Telegram + email) as sole developer; two-stage retrieval with *all-MiniLM-L6-v2* + cross-encoder re-ranking before LLM generation.
- Embedded institutional knowledge base into PostgreSQL with pgvector; deployed a staff dashboard (SQLite, own subdomain) so non-technical staff can update the knowledge base without code.

Brain-Computer Interface Lab — SCSU

St. Cloud, MN | Aug 2024 – May 2025

Undergraduate Research Assistant

- Maintained and debugged the Avatar platform's EEG anonymization pipeline; fixed file-organization logic to correctly classify brainwave recordings by thought category for IRB-compliant ML training.
- Implemented RSA key-management scripts for a shared AI HPC server; resolved UI/UX issues across an 8-tab PySide6/QML desktop app and maintained Ubuntu compute infrastructure for a multi-contributor platform.

Kibur College (SIS/LMS)

Remote | Summer 2024

Software Engineering Intern

- Built Flask/FastAPI REST microservices with RBAC supporting 1,200+ student records; integrated Firebase Auth, Google Sheets API dashboards, and GitHub Actions CI — cut admin processing time ~80%.

Center for Women in Technology — UMBC

Baltimore, MD | Fall 2023 – Spring 2024

Technical Operations Assistant

- Built Python + Google Sheets API automation for event attendance (50–100 participants/session), reducing manual work ~85%; maintained CWIT website and supported 200+ program participants.

PROJECTS

AI Event & Content Aggregator

Demoed at NSBE 2026

Python · PostgreSQL · OpenAI API · Streamlit · Docker

- End-to-end AI pipeline ingesting YouTube + iCal feeds, summarizing with GPT-4o-mini structured output, and delivering personalized HTML digests via email; context-aware curator agent re-ranks content per user profile (engineer / founder / PM) using LLM reasoning.
- Production-style monitoring layer with run lifecycle tracking, per-stage metrics, and graceful degradation; Streamlit console with live DB stats and in-app email delivery.

Real-Time Surveillance & Analytics System

Python · YOLO · MediaPipe · Flask · SQLite · Streamlit

- Multi-stage CV pipeline: YOLO detection → MediaPipe pose → centroid tracker → fall detection / crowd density logic; Flask API triggers real-time email + WhatsApp alerts; Streamlit dashboard for history review.

NearbyTalk · Fleet Command: Strategic Conquest · ASL Gesture Classifier

React · FastAPI · MongoDB · JWT / Unity · C# · Claude API / Python · MediaPipe · TensorFlow

- Anonymous social platform with .edu domain-gated feeds, JWT auth, threaded posts, and karma voting (Docker-deployed).
- 4X strategy + deck-building game with hex-grid conquest and Claude API AI opponents; full game state serialized to JSON for LLM decision-making.
- Real-time ASL classifier using MediaPipe Holistic keypoints + LSTM sequence recognition across 30-frame windows; live webcam inference via Streamlit.

TECHNICAL SKILLS

AI / LLM: RAG Pipelines · LangChain · sentence-transformers · pgvector · Prompt Engineering · Anthropic API · OpenAI API · TensorFlow · PyTorch · Scikit-learn · MediaPipe · YOLO · OpenCV

Backend: Python · FastAPI · Flask · REST APIs · PostgreSQL · SQLite · MongoDB · SQLAlchemy · Docker · GitHub Actions (CI/CD) · Render · Vercel

Frontend: React · Angular · Streamlit · Tailwind CSS · HTML/CSS · PySide6/QML · Unity · C#

Systems: Linux/Ubuntu · SSH · Bash · Multi-threading · Real-Time Pipelines · Microservices · AWS (familiar) · GCP

Other: C++ · Java · TypeScript · Statistical Modeling · OOP / Software Design · Google Sheets API · Git / GitHub
